Danish Seed Import

CHRIS MOSBERG

206 Seventh Street North

MINNEAPOLIS, MINN.

Office: Geneva 3401

Residence: Geneva 7477

In sending out this our seventh annual Seed List, we wish to thank all our customers for the patronage given us during the past years, and hope all of you will continue to send your order this way, and tell your friends about us, too. We are trying to have only the very best obtainable in seeds, and are importing most part from Denmark. Where the American seeds are better than foreign, we have the American grown, but a good many kinds are grown more successfully in the northern climate of Denmark.

Assuring any order you may send us our very best attention, we are,

Respectfully yours,

DANISH SEED IMPORT,

Chris Mosberg.

Minneapolis, Minn., January, 1921.

TERMS

All prices subject to change and to being unsold.

5% cash discount allowed if money accompanies order.

Delivery charges will be paid by us for all seeds except peas, beans, sweet corn, field seeds and bulbs.

All seeds are tested for germination, and those tests are at your service, if desired.

We use every care in having all seeds pure and reliable, but will not in any way be responsible for quality, description or the crop.

Chris Mosberg.

HAVE THE MAGGOTS BEEN GETTING FAT ON YOUR VEGETABLES

?

Every Gardener knows that it is practically impossible to grow Radishes, Kale, Cabbage, Onions, Turnips, or Cauliflower under ordinary conditions, and that the few remedies that have been tried in the past are either unreliable, or too troublesome and expensive to be used by the average Gardener. As a result in many sections of the country they have almost given up trying to grow these vegetables, knowing only too well that Maggots and other pests would eat half the crop and spoil the other half.

But "MAG-O-TITE" has changed all this. It is a remedy that has absolutely proven all we claim for it and so wonderful are the results obtained by its use that the Manufacturers are finding it a big problem to keep up with the demand. Read what other users say about it and then try it on your own crops. You'll get the best results ever.

HOW "MAG-O-TITE" ACTS

"Mag-O-Tite" acts as a preventive by repelling the Fly which lays the eggs from which the Maggots are hatched and it also destroys Maggots which are already in the soil. While intended primarily as a remedy for Root Maggots, it has proved very effective in combating Earth Worms of all kinds, the Strawberry Crown Borer, Cabbage Worms, Asparagus Miner, Flea Beetles, Cut Worms and all kinds of Slugs.

It is also invaluable for the eradication of Earth Worms from Lawns, Putting Greens and other fine turfs.

HOW "MAG-O-TITE" IS APPLIED

The ease with which it is applied is just one more attractive point about "MAG-O-TITE." It is simply sprinkled in and over the Drills when seeding, and around the roots when planting, and after the plants are through it is sprinkled around and alongside of them.

For the eradication of EARTH WORMS of all kinds sprinkle freely on the ground and then sprinkle lightly with water.

It is not injurious to Plant Life in any way, but on the contrary is a valuable stimulant and Fertilizer.

LISTEN TO THE MAN WHO HAS USED "MAG-O-TITE"

After using "Mag-O-Tite" I raised three acres of the finest Poultry Kale and Radishes you ever saw.

In a last attempt to raise Onions, Turnips and Radishes I bought a bag of Mag-O-Tite and it resulted in the best garden I have ever grown.

I have found Mag-O-Tite to be just what I wanted. It has put an end to every insect I have tried it on.

On the first trial of Mag-O-Tite we have had splendid results with Cabbage and Cauliflower and our Radishes are fine big red ones.

My Aster Plants were already kinking up with bugs when I took home a package of Mag-O-Tite in desperation. The results were simply marvelous, every plant was saved.

It is a sure remedy for Root Maggots and has eliminated the Strawberry Crown Borer wherever I have used it.
